REASONS FOR ALLOWANCE

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/2/2009 has been entered.

The following is an examiner's statement of reasons for allowance:

Ototani (US 4,094,666) teaches that the feeding rate is related to the properties of the core material (column 4, lines 22-26). Gueussier et al (US 4,531,972) teaches that the speed of the wire is adjusted in the function of the calcium content (column 3, lines 4 and 5). Wirth, Jr. (US 4,512,800) teaches that the injection is dependent on the fluid pressure, which is a function of the composition of the metal bath (column 4, lines 18-25). Karinthy et al (US 4,085,252) teaches a relationship between the diameter of the core wire and the speed of introduction (column 3, lines 43-45). The depth of penetration is dependent on the structure of the wire and the speed of introduction (column 4, lines 4-7). However, none of the cited prior art determine the dimensions of the wire based upon the grade of the liquid steel, the bath temperature or the size of the ladle, or determine the speed of injection based on bath temperature or the size of the ladle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
